Genesis Enterprise Mobile Point of Sale System (m-PoS) for Retail Applications

The **NEW Genesis Enterprise Mobile Point of Sale System (m-PoS) – for Retail Applications.**

This is a mobile real time till that works on a tablet. It enables sales staff to be able to check stock levels, take orders, make payment and print receipts on the move, without having to leave the customer! Making it more likely to turn browsing into buying.

- Acts as a **Queue Buster** to check stock levels, take orders, make payments and issue receipts without needing to queue up.

- **Sales Staff are more informed** and can get information at the touch of a button in front of the customer, making it more likely to turn browsing into buying.

- Provides the customer with a **personal retail experience**, making it easier and friendlier to buy.

- Can be used **anywhere** in the store, outdoor events, pop-up stores etc.

- Interfaces to **wireless printer** to provide receipts at point of sale.

- Fully integrated with Genesis back end, to **provide real time stock management.**

Call or email us today to arrange your free demonstration and see what Genesis Enterprise can do for your business !!!
